Terra Nova Releases 2010 Catalog With Classics & Rare Plants

July 30, 2009

Text Size:

A new addition to the Terra Nova catalog this year is the "Collector's Catalog," a 12-page insert that features classic varieties from the breeder, as well as rare finds.

According to the catalog, Terra Nova doesn't throw away older varieties; instead it restarts them and grows them in "stock-blocks" in its field. The collector's catalog is still in its beginning stages, as well. Those at Terra Nova hope to grow the offerings included.

There are more classic plants and expanded cultural information on the website, too, at www.terranovanurseries.com/collectorscatalog.
