Hardiness Zones: 5 - 9

Possible Problems: Insect: Aphids & white fly are possible

Habit: Clumping, shrub like

Diseases: No major

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Soft textured, with feathery variegated foliage for the spring and summer garden. It's leaves are edged white all season followed by a late summer bloom of gentle blue. It's an easy and undemanding plant. This plant is tops for heat and drought-resistance, even in the full sun. Slow to emerge in the spring, so add a bit of extra heat.
