- Minimum
- Maximum

pH: 5.5 - 6.5
Fertilization Recommendations: 100 - 150 PPM
EC: 0.6 - 0.9

Light Levels: Shade to part shade

Hardiness Zones: 4 - 9

Habit: Mounding

Day Length for Flowering: Day neutral

Water Requirements: Dry moderately between waterings

Possible Problems:
- Insect: Foliar nematodes may be a problem for gardens in susceptible areas. Watch for root weevils.
- Diseases: Root rot may occur with excessive soil moisture. Powdery mildew, rust, and leaf spots may occur.

Description

A top-seller around the world and great in the shade! Much more color contrast and more vigorous than Heuchera 'Beauty Color'. Its dark gray-edged silver leaves with red venation are smoother and brighter, bigger, and better. Exceptional fall color, which we label as "pumpkin, neon orange."
