Hardiness Zones: 6 - 9

Possible Problems: Insect: Slugs

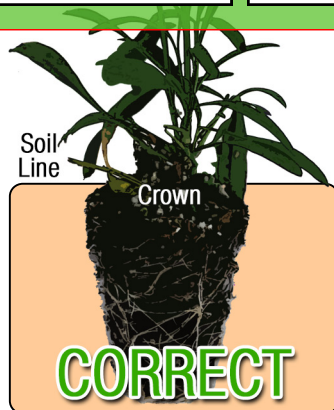

Diseases: Botrytis, root rots

Habit: Clumping

Day Length for Flowering: Short day

Do NOT bury the crown of the plug

Description

Large clusters of yellow eyed, green frilled flowers that last for months on the plant. We've brought this back because we can't believe how often and how long it blooms in the garden. The neat foliage is good in containers. Sandra Tuffin, who bred it, sent us this beauty years ago. Similar to 'Francisca' ('Francesca'), but with better flower count, vigor, and overall beauty.
