Water Requirements: Dry slightly between waterings

Hardiness Zones: 10 - 11

Possible Problems: Insect: --

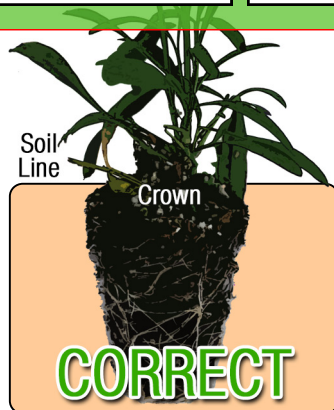

Habit: Upright, shrubby

Diseases: --

Day Length for Flowering: Day Neutral

Do NOT bury the crown of the plug

## Description

Entirely unique new houseplant variety, not available commercially anywhere but TERRA NOVA® Nurseries. Gorgeous deep green strap-like foliage radiates out from a central stalk that grows tougher with age, eventually forming a trunk. Potential specimen indoor tree. Colorful dark leaves covered with bright lime green bullseye spots. Named for resemblances to the cool colors and rounded shapes seen in the precious mineral malachite.
