Hardiness Zones: 10 - 11	Possible Problems: <u>Insect</u> : Spider mites, aphids and mealybugs may occur	
Habit: Upright	<u>Diseases</u> : Anthracnose and wilt are possible	
Day Length for Flowering: Long day		

Description

Can you say, "Bold?" This is one dramatic foliage plant with huge, waxy fronds of reddish-purple tones superimposed over deep green... similar to Ensete 'Maurellii', but with more contrasting leaf and vein color. Use this bold banana for an exotic, tropical look.
