- **pH:** 5.5 - 6.5
- **Fertilization Recommendations:** 100 - 150 PPM
- **EC:** 0.6 - 0.9

### Light Levels
- **Shade**

### Hardiness Zones
- **4 - 9**

### Habit
- **Mounding**

### Day Length for Flowering
- **Day neutral**

### Water Requirements
- **Dry moderately between waterings**

### Possible Problems
- **Insect:** Foliar nematodes may be a problem for gardens in susceptible areas. Watch for root weevils.
- **Diseases:** Root rot may occur with excessive soil moisture. Powdery mildew, rust, and leaf spots may occur.

### Description

Shocking, blood-red veins electrify the golden leaves of this startling Heuchera. The red venation stays while the leaf changes from shades of yellow in spring, to chartreuse in summer and fall, and tan in the winter. Short, dense cones of white flowers. This vigorous, clumping H. villosa hybrid delivers what 'Tiramisu' promised.

**Do NOT bury the crown of the plug**
