Habit: Mounding	<u>Diseases</u> : Root rot may occur with excessive soil moisture. Powdery mildew, rust, and leaf spots may occur.	
Day Length for Flowering: Day neutral		

Do NOT bury the crown of the plug

Description

A golden-amber as bright as the sun! A never before color for heucheras with the added feature of the equally novel deeply cut, lacy foliage. Full habit with dense foliage the changes colors with the seasons. The spring color is pure amber, by early summer, more copper highlights the foliage and by fall, a burnished, copper-umber dominates. An excellent blender for other foliage's in a mixed container and a stunning stand alone.
