

Growing Recipe

HEUCHERELLA 'FIRECRACKER'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 5.5 - 6.5

Fertilization Recommendations: 100 - 150 PPM

EC: 0.6 - 0.9

Light Levels: Full sun to part shade

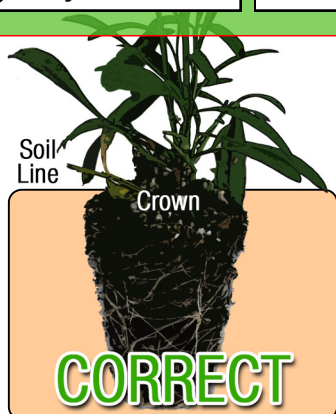

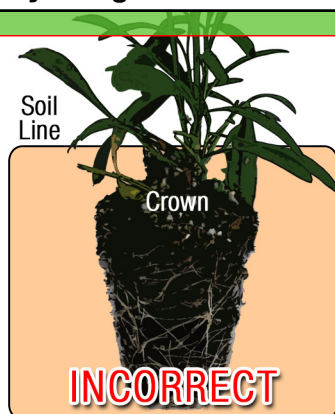

Water Requirements: Dry moderately between waterings

Hardiness Zones: 4 - 9

Possible Problems: Insect: Foliar nematodes may be a problem for gardens in susceptible areas and watch for root weevils.
Diseases: Root rot may occur with excessive soil moisture or poor drainage. **Note**: All Heucherella are rust resistant.

Habit: Mounding

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

Nice cut, golden foliage boldly marked with dark red splashes. This plant performs beautifully in the sun, unlike others on the market. It's always neat with few or no flower spikes for easy maintenance making this a standout foliage component in mixed containers or "Front and Center" of the border. This plant grows with a dense, compact habit.
