

Growing Recipe

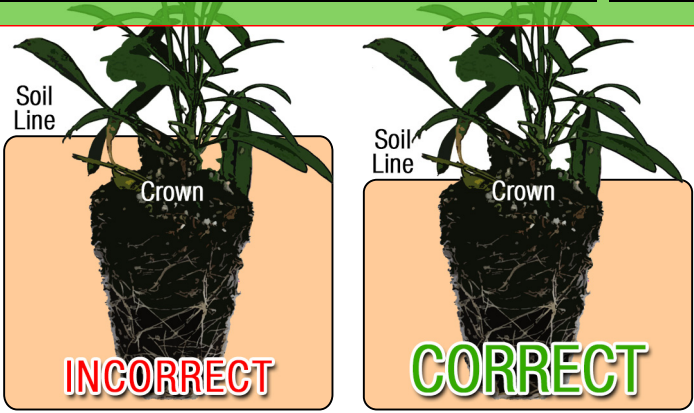

HYDRANGEA 'MIRRANDA'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 5.5 - 6.2	Fertilization Recommendations: 150 - 200 PPM	EC: --
Light Levels: Part shade to shade	Water Requirements: Moist to dry slightly	
Hardiness Zones: 5 - 9	Possible Problems: <u>Insect</u> : None	
Habit: Climbing/twining by aerial rootlets	<u>Diseases</u> : Root rot may occur in poorly drained or over watered soils	
Day Length for Flowering: Day neutral		

Do NOT bury the crown of the plug

Description

Dark green leaves display distinct, irregular yellow margins. The variegation is stronger earlier in the season and becomes more distinct as the plant ages. It forms flat topped clusters of sweetly fragrant white flowers.
