Water Requirements: Keep moist

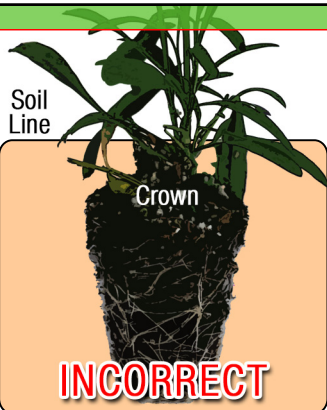

Hardiness Zones: 6 - 9

Possible Problems: Insect: None

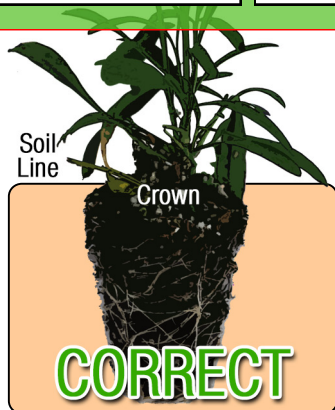

Diseases: None

Habit: Upright, clumping

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

This recently collected evergreen fern has wonderful, clean, shiny foliage, and a plastic-like texture. Deep green foliage year round looks great in the fall, winter and in spring with early bulbs. The emerging fronds are also a sight, with huge coppery scales. From Judith Jones at Fancy Fronds. Easy to grow and use in the woodland garden or containers for long lasting beauty.
