

Growing Recipe

SISYRINCHIUM 'DEVON SKIES'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 6.0 - 7.2

Fertilization Recommendations: 75 - 100 PPM

EC: --

Light Levels: Full sun

Water Requirements: Dry slightly between waterings

Hardiness Zones: 7 - 10

Possible Problems: Insect: Aphids and spider mites are possible

Habit: Clumping

Diseases: No major problems

Day Length for Flowering: --

Do NOT bury the crown of the plug

Description

This showy, grass-like clumper is covered with dozens of large, sky-blue flowers for weeks in early summer atop deer resistant foliage. It blooms all summer in the NE and South tolerating heat, humidity, poor soils, and drought as long it has good drainage. Super in the rock garden or front of the border. (It's sterile too!) 'Devon Skies' was found in Edmund and Rita Heaton's UK garden (the National Collection Holders for Sisyrinchium).
