

Growing Recipe

TIARELLA 'SEA FOAM'

Approximate Finish Time From Liner

☐ = Minimum ☐ = Maximum

pH: 5.5 - 6.8

Fertilization Recommendations: 150 - 200 PPM

EC: 0.6 - 0.9

Light Levels: Part or full shade

Water Requirements: Dry slightly between waterings

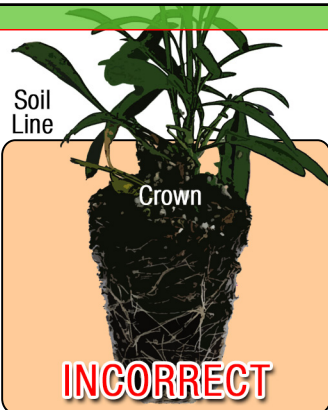

Hardiness Zones: 4 - 9

Possible Problems: Insect: Root weevil in the garden

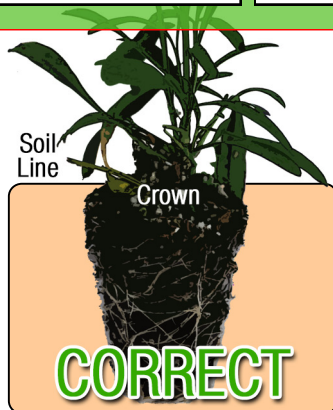

Habit: Clumping

Diseases: Can be affected by root rots if soil is kept too wet

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

The beautifully cut and marked leaves are secondary to the massive display of creamy-white flowers which virtually hide the foliage for weeks. We have no other pure white flowering Tiarella that is so floriferous. Nice compact clumping habit and winter bronzing. Brought back by popular demand.
